

Care Transition Efficiency & Placement Outcome Analytics

Executive Summary Report

Generated On: 11-06-2026

Project Overview

This report evaluates operational efficiency within the care transition pipeline by analyzing transfer performance, placement outcomes, backlog accumulation, and forecasting trends.

Key Performance Indicators

Total Apprehended: 67,337

Total Transfers: 92,641

Total Discharged: 124,853

Operational Assessment

Average Transfer Efficiency: 69.10%

Average Discharge Effectiveness: 2.37%

Forecasting Performance

MAE: 4.67

RMSE: 6.35

R² Score: 0.016

Executive Recommendations

- Improve transfer efficiency between care stages.
- Reduce backlog accumulation through proactive monitoring.
- Strengthen placement outcome tracking.
- Continue forecasting to anticipate future workload trends.
